

# NUR ZAITUL AKMAL BINTI ROMLI

FULL STACK DEVELOPER · MOBILE & WEB

Sungai Buloh, Selangor | 011-6071 0353 | zaitulakmal02@gmail.com | linkedin.com/in/zaitulakmal

## PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in full-stack development using PHP, Laravel, Flutter, React Native, MySQL, RESTful APIs, Git, and Agile methodologies. Currently serving as a Research Assistant at Universiti Malaya on a KPT-funded serious game research project, and simultaneously contributing as a part-time developer at Wariscan Sdn Bhd. Proven ability to develop scalable applications, integrate complex APIs, improve system performance, and deliver production-ready features across mobile, web, and IoT-based projects. Seeking a Full Stack / Mobile Developer role to contribute to high-impact software solutions.

## TECHNICAL SKILLS

|                          |                                                                                   |
|--------------------------|-----------------------------------------------------------------------------------|
| Languages                | PHP, Java, C++, JavaScript, TypeScript, HTML, CSS                                 |
| Frameworks & Tools       | React Native (Expo), Flutter, Laravel, Firebase, Android Studio, WordPress, Figma |
| Databases                | MySQL, SQLite (expo-sqlite / Drizzle ORM), Database Design & Optimisation         |
| API Development          | RESTful APIs, Nutritionix API, Google Workspace API, Open Food Facts API          |
| State & Navigation       | Zustand, React Navigation, Expo Router                                            |
| Data & Visualisation     | SAS Analytics, Tableau, Power BI, Victory Native, MPAndroidChart                  |
| DevOps & Version Control | Git, GitHub, Cloudways, FileZilla, Agile / Scrum                                  |

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                      |

PROJECTS

SlimTrack — Cross-Platform Health & Fitness Tracker 2026 – Present

Solo Developer · React Native (Expo) · TypeScript · SQLite (Drizzle ORM) · Zustand

- Built a full-featured mobile health app covering food logging with barcode scanning, water intake, weight tracking, activity logging, recipes, and nearby grocery store locator.
- Integrated Nutritionix API for real-time nutritional data retrieval via expo-camera barcode scanning.
- Implemented offline-first local persistence using expo-sqlite with Drizzle ORM schema migrations.
- Designed multilingual UI (English & Bahasa Malaysia) using react-i18next and expo-localization with Victory Native charts.

IR Academy — Academic Progress Portal 2026

Solo Developer · Flutter · Firebase (Auth & Firestore) · fl\_chart · Python

- Built a role-based academic portal for IR Academy Homeschool supporting three user roles: Teacher, Student, and Parent.
- Integrated Firebase Auth and Cloud Firestore for real-time lesson log tracking, exam results per term, and auto-generated progress alerts.
- Developed admin dashboard with subject progress visualisation using fl\_chart and live Firestore data streams.
- Built a Python migration script to bulk-import student academic records from Excel into Firestore.

EchoLens — Real-Time Face Detection App (Muzium Telegraf Taiping) 2025

Frontend Developer · Flutter · TensorFlow Lite

- Developed a real-time face detection mobile interface with automated video playback triggered by face presence.
- Integrated camera controls with TensorFlow Lite inference and implemented a cover-page fallback for idle states.

EchoDots — Interactive IoT Museum Interface (Muzium Telegraf Taiping) 2025

Frontend Developer · Flutter

- Built an interactive responsive frontend for an IoT-based museum exhibit application.
- Collaborated with backend team to integrate APIs for seamless real-time data display.

DAWar System — Web & Database Integration 2024

Developer & Designer · Flutter Web · Figma · Google Sheets API

- Designed end-to-end UI/UX in Figma and built the frontend with Flutter Web; integrated Google Sheets as a live backend database.

Zakat Distribution Mobile Application — UiTM Perak 2023

Android Developer · Java · Firebase · SAS · MPAndroidChart

- Built Android app with QR code scanning, real-time tracking, role-based access, and data visualisation via MPAndroidChart.

EDUCATION

Universiti Teknologi MARA (UiTM) 2023 – 2025

Bachelor of Computer Science (Hons) · CGPA: 3.14

Universiti Teknologi MARA (UiTM) 2020 – 2023

Diploma in Computer Science · CGPA: 3.73

SMK Tunku Temenggung 2019

Sijil Pelajaran Malaysia (SPM) · 7A 1B 1C

CERTIFICATIONS

- MySQL for Data Analysis — LinkedIn Learning
