

Nur Zaitul Akmal binti Romli

Full Stack Developer | Laravel, React, TypeScript, Flutter, React Native

Sungai Buloh, Selangor, Malaysia | 011-6071 0353 | zaitulakmal02@gmail.com | linkedin.com/in/zaitulakmal | github.com/zaitulakmal | zaitulakmal.github.io

PROFESSIONAL SUMMARY

Full Stack Developer at EzCare Warranty building production features with Laravel, React, TypeScript, Inertia.js and MySQL. Experienced across web, mobile and hardware-connected software: shipped Flutter and React Native apps to the Google Play Store, delivered on-device AI (TensorFlow Lite) and IoT kiosk installations for Muzium Telegraf Taiping, and develop a Unity serious game as Research Assistant at Universiti Malaya under a Ministry of Higher Education (KPT) research grant. Bachelor of Computer Science (Hons) from UiTM, comfortable with Git, GitHub pull requests and Agile/Scrum delivery.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, Dart, Java, C#, Python, SQL, HTML, CSS
Web Frontend: React, Inertia.js, Tailwind CSS, Vite, Responsive Web Design, UI/UX Design, Figma
Backend and APIs: Laravel, Node.js, Express, RESTful APIs, WebSocket, Laravel Excel, DomPDF
Mobile: Flutter, React Native, Expo, Expo Router, Android (Java), Zustand, Provider
Databases: MySQL, SQLite, Drizzle ORM, Firebase Authentication, Cloud Firestore, Database Design
AI, IoT and Game: TensorFlow Lite, Face Detection, Bluetooth Low Energy, Node-RED, Unity 6, URP, WebGL
Data Visualisation: Recharts, fl_chart, Victory Native, MPAndroidChart, Tableau, Power BI, SAS
Tools and Practices: Git, GitHub, Pull Requests, Agile, Scrum, Firebase Hosting, Android Studio, Cloudways

WORK EXPERIENCE

Full Stack Developer | EzCare Warranty Jan 2026 – Present

- Develop features for the company's car warranty management platform using Laravel 10, Inertia.js, React 18, TypeScript, Tailwind CSS and MySQL.
- Built endorsement and sponsorship request workflows end to end, covering database migrations, Eloquent models, controllers, React pages and the approval queue.
- Delivered Excel exports for policy lists and warranty plan reports using Laravel Excel, and PDF quotation and warranty card documents.
- Built dealer group and dealer production dashboards, a dealer add-on coverage settings module and an admin phone number lookup tool.
- Rebuilt the public company website in React (home, plans, about, career, contact, client and partner pages) with admin-managed event banners.
- Ship changes through feature branches and GitHub pull requests with the development team.

Research Assistant | Universiti Malaya Dec 2025 – Present

Department of Physiology, Faculty of Medicine | KPT Prototype Research Grant Scheme (PRGS) PR005-2025

- Develop BioWare, a Unity 6 role-playing serious game that teaches hematology through 6 clinical cases, 26 scenes and 77 C# scripts, supervised by Dr. Maziah binti Mat Rosly.
- Built a reusable quiz scoring system shared across all clinical cases so new cases can be added without rework.
- Deployed the game to WebGL and resolved a URP video playback failure with a RenderTexture workaround so cutscenes play in the browser.
- Own UI/UX design, frontend development and pilot user testing across the 24-month government-funded research timeline.

Junior Developer (Part-Time) | Wariscan Sdn Bhd Jun 2025 – Present

- Developed EchoLens, a real-time face detection app in Flutter with TensorFlow Lite that automatically plays exhibit videos when a visitor is detected, installed at Muzium Telegraf Taiping.
- Built the EchoDots IoT museum kiosk and the TM Morse Code Challenge 2026 platform, and assisted backend optimisation in Agile sprints.

Junior Full Stack Developer (Contract) | K Digital Technology Jul 2025 – Dec 2025

- Developed responsive frontend interfaces and integrated backend APIs for client-facing products.
- Improved API performance by optimising database queries and restructuring query logic.

Programmer (Trainee) | Wariscan Sdn Bhd Mar 2025 – Jun 2025

- Built Flutter UI components integrated with REST APIs for production applications.
- Improved reporting efficiency by automating data workflows with the Google Workspace API.

Programmer (Trainee) | Operion Ecommerce & Software Sep 2022 – Feb 2023

- Designed and implemented user interfaces with React.js, improving user flow efficiency by 40%.
- Integrated RESTful APIs with the backend team and resolved 90% of client-reported bugs during deployment.

PROJECTS

Slimora Health and Fitness Tracker (Google Play Store)	2026 – Present
<i>Solo Developer React Native, Expo Router, TypeScript, SQLite, Drizzle ORM, Zustand</i>	
- Built an offline-first health app with 33 screens covering food logging, water, weight, workouts, fasting and weekly reports, bilingual in English and Bahasa Malaysia. - Implemented food entry through barcode scanning (Open Food Facts and Nutritionix APIs), an AI photo recognition service and a local Malaysian food database, persisted across 13 SQLite tables.	
TM Morse Code Challenge 2026 National STEM Competition Platform	2026
<i>Developer, Wariscan Sdn Bhd Flutter, Firebase, Bluetooth Low Energy</i>	
- Built one Flutter app with four interfaces (student, practice, admin control and live big-screen leaderboard) for a 30-team national Morse code competition. - Synthesised Morse audio in-app, connected a physical Bluetooth Morse key with flutter_blue_plus, and made round scoring configurable per round.	
EchoDots Interactive IoT Museum Kiosk (Muzium Telegraf Taiping)	2025
<i>Frontend Developer, Wariscan Sdn Bhd Flutter, WebSocket, Node-RED</i>	
Built a kiosk where visitors tap a real Morse key to create and email a digital postcard, receiving hardware events over 6 WebSocket channels from a Node-RED gateway with automatic reconnection.	
IR Academy Academic Progress Portal	2026
<i>Solo Developer Flutter, Firebase Authentication, Cloud Firestore, fl_chart, Python</i>	
- Built a role-based portal for Teacher, Student and Parent users with real-time lesson logs, term exam results, progress alerts and an admin dashboard. - Wrote a Python migration script to bulk-import student records from Excel into Firestore.	
Lensa Kenduri Wedding Disposable Camera Web App	2026
<i>Solo Developer Node.js, Express, SQLite lensa-kenduri.web.app</i>	
Built and deployed a live web app where guests scan a QR code to shoot photos into one shared album, with a host console for live counts, settings and export.	
ORAVIU AI Oral Scanning App Prototype	2026
<i>UI/UX Designer and Developer, Client Project HTML, CSS, JavaScript</i>	
Designed and built a 35-screen interactive prototype covering scanner pairing, live capture, AI analysis results mapped to a 32-tooth diagram, oral health score and clinic finder.	
EduBuddy Interactive Learning App for Kids (Google Play Store)	2026
<i>Solo Developer Flutter, sqflite, Provider, Lottie</i>	
Built an offline learning app with storybooks, worksheets, videos and quizzes, released as an Android app bundle.	
DAWar System Election Campaign Dashboard	2024
<i>Developer and Designer Figma, Flutter Web, fl_chart, Google Sheets API</i>	
Designed the interface in Figma and built a Flutter Web dashboard with state, constituency and locality drill-downs, using Google Sheets as the live data store.	
Zakat Distribution Mobile Application UiTM Perak	2023
<i>Android Developer Java, Firebase, MPAndroidChart, SAS</i>	
Built an Android app with QR code scanning, real-time tracking, role-based access and data visualisation.	

EDUCATION

Bachelor of Computer Science (Hons) Universiti Teknologi MARA (UiTM) CGPA: 3.14	2023 – 2025
Diploma in Computer Science Universiti Teknologi MARA (UiTM) CGPA: 3.73	2020 – 2023
Sijil Pelajaran Malaysia (SPM) SMK Tunku Temenggung 7A 1B 1C	2019

CERTIFICATIONS

- Jr Penetration Tester (TryHackMe); Lean Six Sigma White Belt (MSI)
- MySQL for Data Analysis; CSS Layouts (Flexbox and Grid); WordPress SEO (LinkedIn Learning)
- Google Analytics Individual Qualification; Fundamentals of Digital Marketing (Google)
- Building a Website with HTML and CSS (HRD Corp e-LATIH)
