PROFESSIONAL SUMMARY

Full Stack Developer with experience delivering production web, mobile and hardware-integrated software. Currently develops features for a car warranty management platform at EzCare Warranty using Laravel, React, TypeScript, Inertia.js and MySQL, while concurrently serving as a Research Assistant at Universiti Malaya on a serious game project funded by the Ministry of Higher Education (KPT). Experience includes mobile applications published on the Google Play Store, on-device artificial intelligence (TensorFlow Lite) and IoT installations for Muzium Telegraf Taiping, and the supervision of a software engineering intern.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, PHP, Dart, Java, C#, Python, SQL, HTML, CSS

Frontend Development: React, Inertia.js, Tailwind CSS, Vite, Responsive Web Design, UI/UX Design, Figma

Backend Development: Laravel, Node.js, Express, RESTful APIs, WebSocket, Laravel Excel, DomPDF

Mobile Development: Flutter, React Native, Expo, Expo Router, Android (Java), Zustand, Provider

Databases: MySQL, SQLite, Drizzle ORM, Firebase Authentication, Cloud Firestore, Database Design

AI, IoT and Game Development: TensorFlow Lite, Face Detection, Bluetooth Low Energy, Node-RED, Unity 6, URP, WebGL

Data Visualisation and Analytics: Recharts, fl_chart, Victory Native, MPAndroidChart, Tableau, Power BI, SAS

Tools and Methodologies: Git, GitHub, Code Review, Agile, Scrum, Firebase Hosting, Android Studio, Cloudways

WORK EXPERIENCE

Full Stack Developer | EzCare Warranty

Jan 2026 – Present

- Develop and maintain features for the company's car warranty management platform using Laravel 10, Inertia.js, React 18, TypeScript, Tailwind CSS and MySQL.
- Designed and implemented end-to-end endorsement and sponsorship request workflows, encompassing database migrations, Eloquent models, controllers, React interfaces and an approval queue.
- Developed Excel reporting exports for policy listings and warranty plans using Laravel Excel, together with PDF generation for quotations and warranty cards.
- Delivered dealer group and dealer production dashboards, a dealer add-on coverage configuration module and an administrative phone number lookup tool.
- Redeveloped the corporate website in React, including the plans, careers and client and partner pages, with administrator-managed event banners.

Research Assistant | Universiti Malaya

Dec 2025 – Present

Department of Physiology, Faculty of Medicine | KPT Prototype Research Grant Scheme (PRGS) PR005-2025

- Develop BioWare, a Unity 6 role-playing serious game for haematology education comprising six clinical cases, 26 scenes and 77 C# scripts, under the supervision of Dr. Maziah binti Mat Rosly.
- Engineered a reusable quiz scoring framework shared across all clinical cases, enabling new cases to be integrated without additional development effort.
- Deployed the game to WebGL and resolved a URP video playback defect through a RenderTexture-based solution, ensuring reliable in-browser cutscenes.
- Responsible for UI/UX design, frontend development and pilot user testing throughout the 24-month government-funded research programme.

Junior Developer (Part-Time) | Wariscan Sdn Bhd

Jun 2025 – Present

- Developed EchoLens, a real-time face detection application built with Flutter and TensorFlow Lite that initiates exhibit video playback upon detecting a visitor, deployed at Muzium Telegraf Taiping.
- Developed the EchoDots IoT museum kiosk and the TM Morse Code Challenge 2026 competition platform, and contributed to backend optimisation within Agile sprints.
- Supervised a software engineering intern, covering task assignment and review, code review, performance evaluation and the industrial training report.

Junior Full Stack Developer (Contract) | K Digital Technology

Jul 2025 – Dec 2025

- Developed responsive frontend interfaces and integrated backend APIs for client-facing products.
- Enhanced API performance through database query optimisation and the restructuring of query logic.

Programmer (Trainee) | Wariscan Sdn Bhd

Mar 2025 – Jun 2025

- Developed Flutter user interface components integrated with REST APIs for production applications.
- Improved reporting efficiency by automating data workflows through the Google Workspace API.

Programmer (Trainee) | Operion Ecommerce & Software

Sep 2022 – Feb 2023

- Designed and implemented React.js user interfaces, improving user flow efficiency by 40%.
- Collaborated with the backend team on RESTful API integration and resolved 90% of client-reported defects during deployment.

PROJECTS

Slimora | Health and Fitness Tracking Application (Google Play Store) **2026 – Present**

Solo Developer | React Native, Expo Router, TypeScript, SQLite, Drizzle ORM, Zustand

- Developed an offline-first health application comprising 33 screens for food logging, hydration, weight, workouts, fasting and weekly reports, fully localised in English and Bahasa Malaysia.
- Implemented multiple food entry methods, including barcode scanning via the Open Food Facts and Nutritionix APIs, AI-based meal photo recognition and a local Malaysian food database, persisted across 13 SQLite tables.
- Structured application state across 11 Zustand stores covering streak and badge gamification, fasting tracking and on-device notification scheduling, with charts rendered in Victory Native and React Native Skia.

EduBuddy | Interactive Learning Application for Children (Google Play Store) **2026**

Solo Developer | Flutter, sqflite, Provider, flutter_tts, Lottie, Google AdMob

- Developed an offline-first educational application comprising 21 screens, including a text-to-speech storybook reader, worksheets, quizzes, letter tracing, drawing studios and three mini-games.
- Designed a learner progression model across 14 SQLite tables covering profiles, activity logs, badges, unlocks, daily challenges and game statistics, presented through a parent progress report and daily reminder notifications.
- Published the application to the Google Play Store (version 1.0.4) with release automation through Gradle Play Publisher and monetisation through Google AdMob.

TM Morse Code Challenge 2026 | National STEM Competition Platform **2026**

Developer, Wariscan Sdn Bhd | Flutter, Firebase, Bluetooth Low Energy

- Developed a single Flutter application providing four interfaces (student, practice, administrator control and live leaderboard display) for a national Morse code competition involving 30 school teams.
- Implemented in-app Morse audio synthesis, integration of a physical Bluetooth Morse key through flutter_blue_plus, and configurable scoring for each competition round.
- Featured on Buletin TV3 national news: "30 Sekolah Sertai Cabaran Kod Morse Perak".

EchoDots | Interactive IoT Museum Kiosk (Muzium Telegraf Taiping) **2025**

Frontend Developer, Wariscan Sdn Bhd | Flutter, WebSocket, Node-RED

- Developed a kiosk where visitors compose and email a digital postcard with a physical Morse key, receiving hardware events over six WebSocket channels from a Node-RED gateway.

IR Academy | Academic Progress Portal **2026**

Solo Developer | Flutter, Firebase Authentication, Cloud Firestore, fl_chart, Python

- Developed a role-based academic portal for teachers, students and parents featuring real-time lesson logs, termly examination results, progress alerts and an administrative dashboard.
- Developed a Python migration script to bulk-import student academic records from Excel into Cloud Firestore.

Lensa Kenduri | Wedding Photo Sharing Web Application **2026**

Solo Developer | Node.js, Express, SQLite | lensa-kenduri.web.app

- Developed and deployed a live web application that enables wedding guests to capture photographs through a QR code into a shared album, supported by a host console for live monitoring, configuration and export.

ORAVIU | AI Oral Scanning Application Prototype **2026**

UI/UX Designer and Developer, Client Project | HTML, CSS, JavaScript

- Designed and developed a 35-screen interactive prototype encompassing scanner pairing, live image capture, AI analysis results mapped to a 32-tooth diagram, an oral health score and a clinic locator.

DAWar System | Election Campaign Dashboard **2024**

Developer and Designer | Figma, Flutter Web, fl_chart, Google Sheets API

- Designed the user interface in Figma and developed a Flutter Web dashboard with state, constituency and locality-level drill-down analysis, using Google Sheets as the live data source.

Zakat Distribution Mobile Application | UiTM Perak **2023**

Android Developer | Java, Firebase, MPAndroidChart, SAS

- Developed an Android application featuring QR code scanning, real-time distribution tracking, role-based access control and data visualisation.

EDUCATION

Bachelor of Computer Science (Hons) | Universiti Teknologi MARA (UiTM) | CGPA: 3.14 **2023 – 2025**

Diploma in Computer Science | Universiti Teknologi MARA (UiTM) | CGPA: 3.73 **2020 – 2023**

Sijil Pelajaran Malaysia (SPM) | SMK Tunku Temenggung | 7A 1B 1C **2019**
